Trade your digital assets securely and seamlessly 24/7

Institutional-grade service, competitive live quotes and fast settlements

When you trade with Sygnum, you are trading with a Swiss-regulated bank. You get infrastructure, expertise and knowledge of the digital asset trading team at your fingertips.

Sygnum's digital asset trading technology and operations provide highly secure, seamless trading of digital assets, enabling you to focus on what is truly important – your investment decisions.

The trading landscape for digital assets is fragmented, with many unregulated players and varying operational quality and governance. Trading large amounts on a single unregulated exchange can result in significant price movement. In addition, leveraging the best price across multiple exchanges requires liquidity to be held and managed across platforms, resulting in significant operational overheads.

At Sygnum, we empower you to realise the value of the emerging digital asset class in

this complex landscape. You benefit from the security and trust of trading with a regulated bank, access to the best prices for digital assets through a single platform, and a seamless and convenient trading experience.
